[redacted] comment.

- (1) The fact that several large mills are located in Wurzen and that these regularly received grain from the grain-shuttle operation accounts for the large number of shipments consigned to Wurzen.
- (2) This is the first report from the Halle railroad district headquarters. It allegedly encompasses the entire supply shipments handled on orders of the Soviets. However, a total of 604 carloads for the entire district in June 1952 seems to be too low. The list presumably is incomplete.
- (3) Negro (fnu) and Ozokin (fnu) are known from previous transportation reports. The other names are reported for the first time.
